About Us

Established in 1996, Plural Oil is a premier oil and gas trading company specializing in the trading, storage, and distribution of white products.

With over two decades of experience, we have built a solid reputation for delivering high-quality petroleum products, including Base Oil, Diesel, PMS (Petrol Motor Spirit), AGO (Automotive Gas Oil), Marine Gas Oil, and DPK (Dual Purpose Kerosene).

Plural Oil operates within the Downstream and Midstream sectors, providing innovative and efficient energy solutions to meet the ever-evolving demands of the global market.

**...3 decades of delivering
high-quality petroleum
products...**

About Us

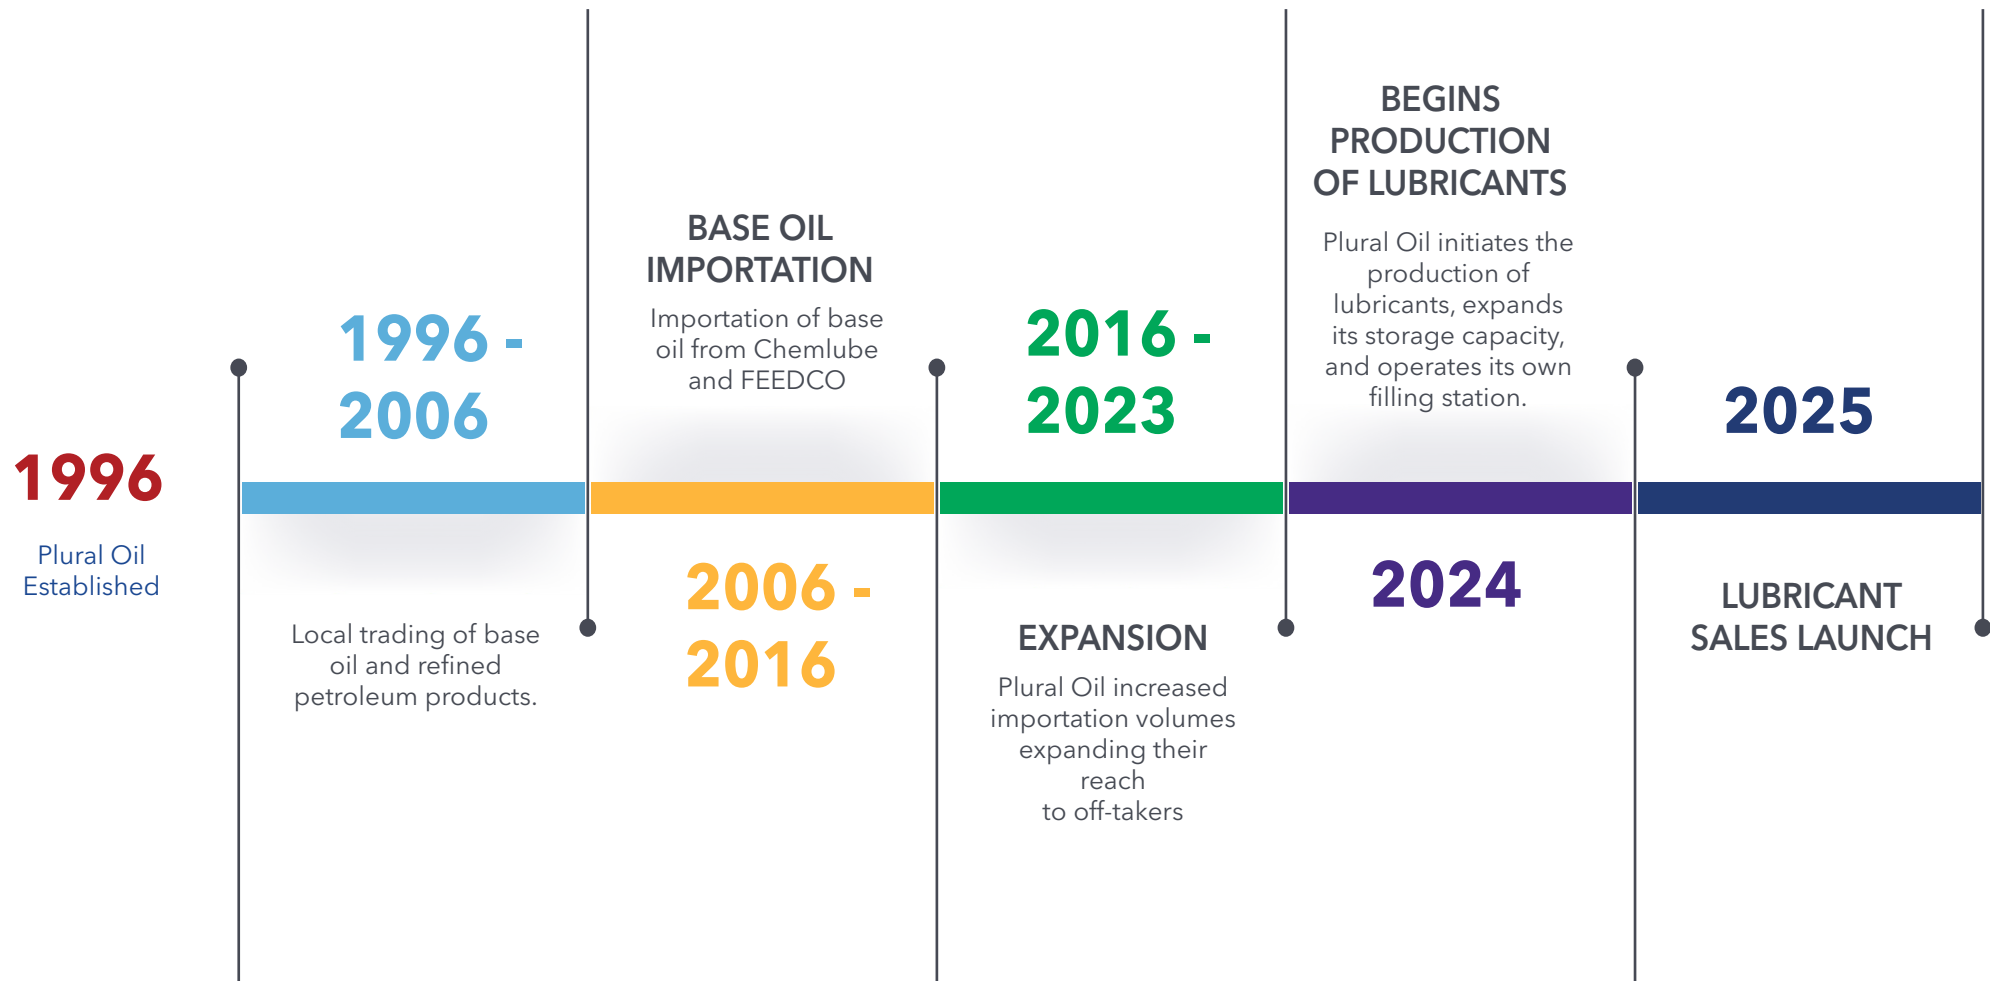

Our commitment to excellence, integrity, and innovation drives us to expand our footprint further, diversify our offerings, and build sustainable relationships with partners and clients. As part of our growth strategy, we are entering new ventures, such as Lubricant Blending and developing a multi-product tank farm storage facility.

Over the years, we have evolved significantly, expanding our footprint and capabilities across the lubricant value chain.

As part of our growth strategy and commitment to delivering end-to-end value, we successfully backward integrated by acquiring and operating a modern blending facility in Mowe, Ogun State. This wholly owned plant serves as the hub for producing our range of premium lubricants, designed to meet the performance demands of automotive, industrial, and marine applications. With strict adherence to international specifications and quality standards, we ensure consistent product performance, efficient supply, and flexible packaging tailored to diverse customer needs

History

Vision

Leading energy solutions provider.

To be a leading energy solutions provider, recognized globally for our commitment to quality, innovation, and sustainable practices in the energy sector.

Mission

Deliver high-quality petroleum product and energy solutions.

To deliver superior petroleum products and services that meet the diverse needs of our customers, while fostering growth, sustainability, and excellence in all our operations.

Core Values (I.N.S.P.I.R.E)

Innovation

Nurturing Sustainability

Safety First

Passion for Excellence

Integrity Always

Responsive to Customers

Empowering Service

Our Services

Comprehensive energy solutions spanning trading, storage, logistics, lubricant production, and facility leasing to drive efficiency and growth in the oil and gas sector.

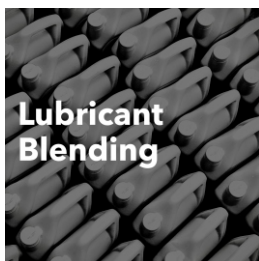

Utilizing deep market expertise and a robust network, Plural Oil delivers competitive trading solutions for refined petroleum products.

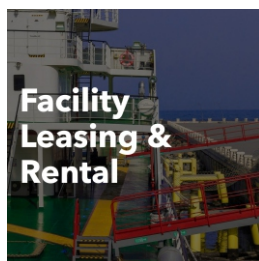

Offering efficient storage options with plans to establish a state-of-the-art, multi-product tank farm to support diverse storage needs.

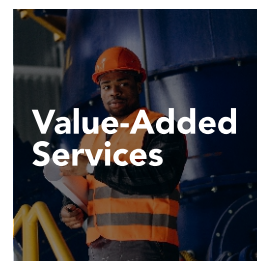

Comprehensive supply chain services, from warehousing and transportation to final delivery, ensuring smooth and reliable product distribution.

We operate a modern blending facility located in Mowe, Ogun State with strict adherence to international specifications and standards.

Facility Leasing and Rental: Providing access to well maintained facilities for storage and operational use, available for flexible rental arrangements.

We also offer tailored lubricant blending services, advanced used oil analysis in our world-class lab, and expert-led lubrication training covering fundamentals, handling, analysis, and applications, ensuring quality, compliance, and enhanced team competence.

At the core of our service, Plural Oil is driven by a commitment to quality, innovation, and sustainability, providing reliable energy solutions and fostering a culture of excellence and integrity.

Products

Discover Plural Oil's range of premium products, crafted to meet the unique demands of every engine and driving condition.

MONOGRADE OILS

PLU HD 40 SF/CF

A multi-functional mineral engine oil for gasoline and heavy duty engines. The product provides good lubrication after cold starting with maximum cleaning properties, it reduces engine maintenance cost as it protects against rust, prohibits corrosion and thus limits engine wear.

PLURAL DIESEL OIL CF/SF

A good quality diesel engine oil specially formulated to give reliable all-year-round service in light, medium and heavy duty, naturally aspirated engines. It exceeds the performance requirement of API CF/SF service classification.

MULTIGRADE: GASOLINE ENGINES

20W/50 SL (PLU VIGOR 5000)

A high-performance multigrade motor oil for all vehicles, providing superior engine protection, reduced wear and corrosion, and enhanced cleanliness. It ensures easy cold starts, excellent high-temperature stability, and optimal viscosity retention. With advanced detergent and dispersant properties, it helps prevent sludge buildup and deposits. Its anti-oxidation and anti-foam characteristics further enhance engine efficiency and longevity.

MULTIGRADE: DIESEL ENGINES

15W/40 CI-4 (PLURAL SATURN)

A high performance and top quality diesel engine oil formulated to meet the API CI-4 Specifications. It provides the ultimate all round performance in all automotive high speed, Turbo-charged, heavy duty four stroke diesel engines used throughout the road transport, construction industries and certain stationary units. The outstanding detergent, dispersant and Anti wear properties keeps the engine clean and efficient control of soot, sludge and piston deposits.

HYDRAULIC OILS

PLURAL HVI 100

Plural HVI 100 Oil is a high-quality, heavy-duty hydraulic fluid designed for high-pressure and severe operating conditions. It provides exceptional wear protection, thermal stability, and oxidation resistance, ensuring smooth and efficient system performance. With advanced water separation, foam control, and corrosion resistance, it helps prevent system failures, prolongs equipment lifespan, and ensures dependable performance, making it perfect for industrial machinery, heavy construction equipment, and high-pressure hydraulic systems.

PLURAL HVI 68

A high-quality anti-wear hydraulic oil designed for industrial and mobile applications. It offers excellent wear protection, corrosion resistance, and filterability. With superior thermal stability, oxidation resistance, foam control, and water separation properties, it ensures smooth operation, extended equipment life, and optimal performance in demanding conditions.

PLURAL HVI 46

Plural HVI 46 Oil is a premium anti-wear hydraulic fluid designed for industrial and mobile equipment. It provides excellent wear protection, thermal stability, and oxidation resistance, ensuring smooth and efficient system performance. With enhanced water separation, foam suppression, and corrosion resistance, it minimizes downtime and prolongs equipment lifespan, making it well-suited for construction, manufacturing, and heavy-duty hydraulic systems.

PLURAL HVI 32

Hydraulic 32 Oil is a premium anti-wear hydraulic fluid designed for precision hydraulic systems and light-to-medium-duty industrial equipment. It offers excellent lubrication, thermal stability, and oxidation resistance, ensuring smooth operation and extended system life. With superior water separation, anti-foam properties, and corrosion protection, it minimizes wear, reduces downtime, and enhances equipment efficiency, making it ideal for manufacturing, construction, and mobile hydraulic applications.

GEAR OILS

PLU EP 140

PLU EP 140 is a high-performance extreme pressure (EP) gear oil designed for manual transmissions, differentials, and heavy-duty gear systems operating under high loads and extreme conditions. It provides exceptional wear protection, thermal stability, and oxidation resistance, ensuring smooth and reliable performance.

With advanced anti-wear, anti-foam, and corrosion protection additives, PLU EP 140 minimizes friction, reduces gear wear, and extends equipment life, making it ideal for automotive, industrial, and off-road applications.

PLU 85W/140

Premium multi-grade EP gear oil designed for manual transmissions, hypoid differentials, and heavy-duty gear systems. Offers excellent wear protection, thermal stability, and oxidation resistance. Formulated with advanced additives to reduce friction, prevent corrosion, and extend equipment life. Ideal for automotive, industrial, and off-road use. Meets API GL-5 performance standards.

TRANSMISSION FLUID

PLURAL ATF DEXRON III - Premium Automatic Transmission Fluid

PLURAL ATF Dexron III is a high-quality transmission fluid designed for smooth shifting, superior wear protection, and extended transmission life. It offers excellent thermal stability, oxidation resistance, and anti-foam properties, ensuring reliable performance in automatic transmissions, power steering systems, and hydraulic applications.

With enhanced friction stability and shear resistance, it maintains optimal viscosity under extreme conditions, preventing wear and fluid breakdown. Suitable for passenger cars, commercial vehicles, and heavy-duty applications, PLURAL ATF Dexron III ensures consistent performance and long-lasting protection.

MARINE LUBRICANTS

PLUMER 404

High-quality 404 Marine Lubricant designed for superior wear protection and performance in harsh marine environments. Offers excellent oxidation stability, corrosion and rust protection, and effective water separation. Features high viscosity stability, detergent and dispersant properties for engine cleanliness, and enhanced load-carrying capacity. Ideal for high-load, high-temperature operations, ensuring reduced oil consumption and longer engine life. Complies with modern emissions standards for cleaner operations.

NEPTUNE HLP

Plural Marine Hydraulic Oil is a premium anti-wear hydraulic fluid specially designed for marine and offshore applications. Engineered to withstand harsh marine conditions, it offers excellent oxidation stability, corrosion resistance, and water separation properties to ensure smooth and reliable hydraulic system performance. Its anti-foam and anti-rust additives protect critical components from wear, reducing maintenance and prolonging equipment life. Suitable for deck machinery, steering systems, winches, and hydraulic controls, Plural Marine Hydraulic Oil ensures efficient power transmission and long-term system durability in both coastal and deep-sea operations.

TITAN EP

Plural Marine Gear Oil is a high-performance extreme pressure (EP) gear lubricant, formulated to protect marine transmissions, propeller shafts, and heavily loaded gear systems. Designed for harsh maritime environments, it provides exceptional load-carrying capacity, wear protection, and thermal stability, ensuring smooth and reliable operation under extreme pressures. With advanced anti-corrosion, anti-foam, and water-resistant properties, it prevents rust, minimizes foaming, and maintains gear efficiency even in high-moisture conditions. Ideal for marine propulsion systems, reduction gears, and other heavy-duty marine applications, Plural Marine Gear Oil ensures optimal performance and extended component life at sea.

Fueling Progress, Driving Excellence.

Leadership

Tunde Oyefolu

Managing Director/Chief Executive Officer

Tunde Oyefolu, Managing Director and Chief Executive Officer of Plural Oil Marketing Limited, is a seasoned industry leader with decades of experience in Nigeria's downstream oil and gas sector. A graduate of Chemistry from the University of Ibadan, his interest in the oil industry was first ignited during his NYSC service with the Nigerian National Petroleum Corporation (NNPC).

Following this, he began his professional career at General Oil Limited, where he quickly rose through the ranks. His exceptional performance led to a transfer to the company's London office, where he was immersed in large-scale trading of refined petroleum products and lubricants. This international exposure significantly broadened his understanding of global energy markets and cemented his expertise in petroleum trading and supply.

He continued to expand his wealth of experience in the downstream sector during his time with General Oil until 1996, when he took the bold step of establishing Plural Oil Marketing Limited. Under his visionary leadership, Plural Oil has grown from a small trading outfit into one of Nigeria's most respected downstream oil companies, with a strong reputation in the niche base oil market. Over the years, the company has imported and traded hundreds of millions of litres of petroleum products nationwide, supplying major blenders and supporting the growth of Nigeria's energy sector.

Most recently, he has overseen another milestone in the company's journey – the commissioning of Plural Oil Marketing Limited's state-of-the-art lube oil blending plant and the launch of its own range of lubricant products. This achievement not only demonstrates his commitment to innovation and value creation but also marks a new chapter in the company's contribution to Nigeria's industrial and economic development.

As MD/CEO, Tunde Oyefolu continues to drive Plural Oil Marketing Limited's vision of excellence, reliability, and leadership in the downstream oil industry, while positioning the company for long-term growth in both domestic and international markets.

Leadership

Ayomide Oyefolu Chief Operating Officer

Ayomide Oyefolu is a versatile professional with a degree in Business & Management from King's College London (KCL) and a career spanning the oil and gas, logistics, and lubricant blending industries.

His career began during his NYSC service in 2014 at the Honeywell Nigeria Lube Blending Plant, where he gained valuable first-hand exposure to lubricant blending operations. This experience sparked his lasting interest in lubricant production and laid the foundation for his career in the energy sector.

He later explored the logistics and haulage industry, gaining insight into supply chain efficiency, before returning to the oil and gas industry. At Plural Oil, Ayomide has over the years supplied substantial volumes of base oils while also forging and maintaining long-term relationships with major lubricant blenders and facilities, including Ardova, OVH, Bestaf, Forte Oil, and Prudent Energy. While his trading experience also spans AGO and PMS, his work in base oils has been the most prominent, positioning him as a trusted and consistent partner to leading blenders in Nigeria.

Through his base oil trading activities, Ayomide has also developed expertise in international trade dynamics, vessel logistics, and cross-border supply chains, broadening his understanding of global petroleum markets. His career reflects a blend of international education, industry exposure, and commercial acumen, with a strong focus on efficiency, reliability, and growth in Nigeria's energy sector.

Leadership

Clement Evbonaye Plant Manager

Clement Evbonaye is an accomplished Plant Manager with over 16 years of experience in the oil industry, including a strong background with Elf Oil/Total. With a solid foundation in mechanical engineering and lubricant production, he has built a career around driving operational excellence, maintaining strict quality standards, and solving complex technical challenges within blending plant operations.

He holds qualifications in Mechanical Engineering from the Petroleum Training Institute, Warri, Kaduna Polytechnic, and Yaba College of Technology, and is ISO-certified. Over the years, Clement has successfully overseen large-scale blending operations, optimizing production processes, implementing safety protocols, and ensuring compliance with international and local industry standards. His leadership has consistently ensured smooth operations, product integrity, and cost efficiency across every stage of production.

Drawing from his extensive background, Clement's areas of expertise include plant operations management, lubricant blending and formulation, quality control and assurance, process optimization, equipment maintenance, regulatory compliance, and team leadership. His experience spans managing raw material inputs, overseeing automated blending systems, monitoring product performance, and ensuring that every batch produced meets the highest technical specifications and customer requirements.

Clement's professional philosophy is centered on efficiency, safety, and innovation. He believes that running a world-class blending plant requires not only technical expertise but also a culture of consistency, accountability, and continuous improvement. By fostering collaboration and precision at every stage of production, he ensures that products exceed industry benchmarks while reinforcing trust in the company's operational capacity.

Leadership

Olanrewaju Funmilayo Chemist (Lubricants)

Olanrewaju Funmilayo is a seasoned chemist with over 11 years of experience in the oil and gas industry, specializing in lubricant production, formulation, and quality control.

Her professional journey began in June 2014 at Highlight Oil and Gas Limited, where she developed strong technical foundations in petroleum product testing and laboratory analysis. She then advanced her career across several reputable lubricant-producing companies, including General Lube (2017-2018), Autosheck Limited (2018-2020), and Petrocam (2020-2023). These roles allowed her to broaden her expertise in raw material compatibility, product durability, customer satisfaction, and regulatory compliance.

Today, at Plural Oil Marketing Limited, Funmilayo plays a leading role in lubricant production, ensuring strict adherence to industry standards while driving process innovations that enhance both efficiency and product performance.

Over the course of her career, she has developed extensive expertise in lubricant formulation and testing, quality assurance, product analysis, laboratory procedures, and product development. Her work has also been strongly anchored in compliance with key regulatory authorities such as the Standards Organisation of Nigeria (SON) and the Department of Petroleum Resources (DPR).

Funmilayo believes that excellence in quality control is not only about technical expertise but also about consistency, innovation, and the relentless pursuit of improvement. She remains deeply committed to ensuring that every product she delivers meets – and exceeds – industry expectations, reinforcing both customer trust and company credibility.
